Appreciation towards **Basis architectural bureau** (<http://ab-basis.com/>) for providing the following description:

设计团队在地形变化复杂的河堤上营造出丰富多彩的景观，是将场地缺点转化为优点的优秀范例。

Creating an all-inclusive promenade on the bank of a river with a complex relief is an example of how you can turn the apparent disadvantages of a place into its advantages.

该项目的目标是在松软的河岸上创造出适合各个年龄段居民的公共空间。因而其总规划策略是将 Bykovka 河岸陡坡上的狭长小路，改造成含有架空露台的多功能滨水长廊。

Objective: To create a public space on the swampy riverbank for residents of all ages. Solution: The narrow path on the steep bank of the Bykovka river turned into an all-inclusive promenade with balconies on stilts and various functional zones.

新河岸被分为两个主要区域：安静休闲区及活动区。活动区内包括遛狗区，适合钓鱼的突出平台，适合不同年龄游玩的游乐场及可以举办活动的中心区。安静休闲区则是一条蜿蜒的栈桥，掩映在葱茏的树丛中，既有风景优美的观景点，又有隐蔽的休憩空间。

The new embankment is divided into 2 main zones: 'quiet' and 'active'. The 'active' area includes a dog walking area, projecting balconies suitable for fishing, a playground for different ages and a central area for events. The 'quiet' zone is a long promenade on winding bridges among trees with scenic balconies on stilts and secluded places for rest.

该项目的精彩之处在于复杂地形处架起的栈道及露台。栈道的设置帮助设计团队拓宽了点的可用面积，并更好地规划出河景的最佳观赏区。蜿蜒的木质小路延长了步行路线的长度，同时为自行车骑行及婴儿车的使用提供了便利条件。主漫步线路起始于视野绝佳的观景台，让游客可以零距离拥抱自然隐秘的美。

A feature of the project was the installation of balconies and walkways on stilts where the relief was complex. Thanks to this we managed to significantly increase the usable area of the embankment and plan recreation areas with the best view of the river. With the help of winding wooden paths we increased the length of the walking route and made it convenient for bicycles and prams. The main hiking route goes off from the scenic balconies, so nothing prevents visitors from enjoying the privacy of nature.

项目中采用了极简现代风的城市家具，由钢条和松木制成，突出了木材原生态的自然色。家具朴素的配色和纯粹的造型使其能与自然环境巧妙的融合。平台的围栏被设计成“不规则”的形制，长短不一，更好地突出了自然感氛围。

Minimalist modern street furniture made of steel and treated pine is used in the project and emphasizes the natural colour of the wood. Thanks to its modest colour scheme and basic design, it blends in delicately with the natural environment. This naturalness is especially distinct in the fencing around the decks which have a slight 'irregularity' of the rods.
